

Jewel of Truth

Jewel of Truth will **expose your innermost secrets and reveal your future!** If the Jewel of Truth points to your colored jewel, you must reveal a secret, while other players try to guess what you will say. When players match your answer, you both earn fortune cards. A game for 2 – 4 players, ages 8 and up.

Object of the Game

The first player to get five different Fortune Cards wins!

Setup

Shuffle and place 10 Question Cards in the center of the play area. Set aside the remaining cards, to be used after the first 10 are gone.

Play!

Find out who will be the Truth Teller:

In this game there are NO turns! The Jewel of Truth decides who the question is about.

- To start, one player swings the Jewel of Truth. Now wait to see whose jewel it points to.
- When the Jewel of Truth stops swinging, if it is pointing at YOUR color, then you are the “Truth Teller” for this turn, and you get to answer the question. Everyone else will be the “Guessers” for this question and will try to match your answer.

If the Jewel of Truth points to a jewel that no one has, then each player must pass her jewel to the player on the left. Swing the Jewel of Truth again.

If the Jewel of Truth doesn't point to any jewel, then the players must not be concentrating hard enough on their secrets! Swing again!

The Truth Teller secretly answers:

- The Truth Teller flips over the top Question Card, and reads the card out loud.
- Then the Truth Teller SECRETLY chooses her favorite answer by placing her jewel in the corresponding spot (A, B, or C) inside her answer case and closing the case so no one can see!

The Guessers try to guess the Truth Teller's answer:

- Now each Guesser secretly selects the answer she thinks the Truth Teller will choose by placing her jewel in the corresponding spot (A, B, or C) inside her answer case. Guessers should close their cases right away so all answers are secret! Remember, Guessers must try to match the answer of the Truth Teller!
- On the count of “1, 2, 3!” all players flip open their answer cases.
- The Truth Teller counts how many other players match her answer and takes that many Fortune Cards. The Guessers who matched the Truth Teller's answer also get to take that many Fortune Cards. DON'T LOOK at the Fortune Cards! Just place them face down in front of each player.

For example, if one other player matches the Truth Teller's answer, then the player who matched and the Truth Teller each get ONE Fortune Card. If two players match the Truth Teller's answer then the players who matched and the Truth Teller each get TWO Fortune Cards!

- The Fortune Cards come in FIVE different categories (Love, Family, Friends, Wealth, and Power). You may only keep ONE card from each of these categories, so if you draw a card from a category that you already have, you must put the first card BACK in the box, WITHOUT LOOKING at either fortune!
- Keep Playing! After all matching players take the right number of Fortune Cards, give the Jewel of Truth another swing to see who must answer the next question.

If the Jewel of Truth points to the same color 3 times in a row, then each player passes her jewel to the player on the left. Swing the Jewel of Truth again!

Ending the Game

The first player to get five Fortune Cards – one from each of the categories – is the winner! After everyone draws the Fortune Cards, there may be more than one winner. Read the Fortune Cards out loud so that everyone can learn what her future holds!
